Mariam Nader

Address: Nabatiyeh-Lebanon | **Phone:** 00961 76 196 536 | **Email:** mariamnader034@gmail.com **Birthdate:** August 6, 2003

Objective

Detail-oriented **Computer Engineering** graduate (GPA: 3.7/4.0) pursuing a **Master's degree in Computer and Communication Engineering.** Equipped with hands-on experience in **mobile and web development** through an **internship at Cedars Software Solutions**, as well as strong skills in software development, database design, embedded systems, and digital electronics. Developer of projects such as MedAlert and a Wedding Planner system using MySQL and Java GUI. Strong communicator with proven tutoring experience and solid analytical and problem-solving skills. Seeking to contribute technical expertise and innovative thinking in a dynamic work environment.

Education

Lebanese International University (LIU)

- Master's Degree in Computer and Communication Engineering | 2025-Present
- Bachelor's Degree in Computer Engineering**, GPA: 3.7/4** | 2021-2025

Projects:

- **Senior Project – MedAlert** Designed a smart system to monitor drug storage conditions and remind patients to take medication.
- **Wedding Event Planner (Database Project)** -Created a wedding booking system using XAMPP and MySQL to manage clients and reservations.
- **Wedding Planner (Java GUI Application)**-Built a desktop application using Java GUI for event planning and service selection.
- **2-Bit ALU (Logic Lab)** - Designed a logic unit to perform decrement and shift operations using multiplexers.
- **Water Level Detector (Electronics Lab)** -Built a transistor-based circuit to detect and alert when water reaches a specific level.
- **ROBOMED (Tinkercad – Intro to Engineering) -** Simulated a system that controls medication storage and gives voice reminders using Tinkercad.
- **FM Demodulator (Analog Lab) -** Constructed a PLL-based circuit to demodulate FM signals and extract audio output.
- **Low Pass Filter (Electric Circuit Lab) -** Designed a circuit that filters out high-frequency signals while passing lower ones.

Experience

Intern – Mobile & Web Developmer **| September 2025 – November 2025 |**

Cedars Software Solutions (CSSLTD) | **Nabatiyeh, Lebanon**

- Worked with the Mobile Development Team using **Flutter** to build dynamic Attendance Management features
- Integrated backend APIs developed in **PHP** with a **MySQL** database as part of a full-stack architecture
- Contributed to the Web Development Team by developing website components using **HTML, CSS, and JavaScript**
- Worked with modern stack technologies including **Supabase, Vercel, and Next.js** in backend and deployment environments

Private Tutor **| 2022 – Present |**

Freelance

- Delivered private sessions for high school students in **Mathematics and Physics**, breaking down **complex theories** into understandable components
- Taught **university-level engineering** subjects such as electronics, programming, digital logic, and microcontroller systems
- Assisted students with understanding course material **and lab experiments** through problem-solving and simulations
- Created personalized lesson plans that align with student goals, enhancing engagement and academic performance

Freelance Computer Engineering Projects **| 2024 – Presesnt |**

Remotely

- Assisted peers and junior students with **project development in Java, Arduino,** and **circuit design**
- Built small applications such as calculators, login systems, and database forms as practice or by request
- Designed and tested circuit simulations using **Tinkercad** and **Proteus** for academic assistance

Trainings and Certificates

- Cybersecurity Boot camp – CyberTalents (Cohort 9) |September – October 2024|
  Covered network threats, basic ethical hacking, and secure system design principles.
- Photography Course – Creative Academy (2023)
  Focused on camera handling, lighting, photo editing, and basic principles of visual storytelling.

Personal Skills

- Strong Communication & Teaching Skills
- Creative Problem Solver
- Attention to Detail
- Adaptability in Technical Environments
- Time Management & Organization
- Team Collaboration & Leadership
- Analytical and Logical Thinking

Technical Skills

- Microsoft Office (Word, Excel, PowerPoint)
- Programming Languages: Java, Python, C, C++, Assembly
- Web & Database: HTML, CSS, JavaScript, MySQL, XAMPP, PHP, RESTful APIs, Responsive Web Design, Supabase, Next.js
- Mobile Development: Flutter, UI Components, API Integration
- Software Development: Java GUI, NetBeans, Visual Studio, Object-Oriented Programming, Git (Version Control), Postman (API Testing)
- Hardware & Electronics: Arduino, Tinkercad, Proteus, Multisim, Logic Design, FM Receivers, Low Pass Filters, FreeRTOS (Real-Time Operating Systems)
- Networking & Security: Packet Tracer, Network Fundamentals, Cybersecurity Basics
- Multimedia & Design: Photography, Logo Design, Canva, Adobe Photoshop (basic), Visual Content Creation
- Tools & Platforms: MATLAB, Octave, Eclipse, Git, Vercel, Claude Code
- Operating Systems: Windows, Linux (basic)

Languages

Arabic: Native **| English:** Fluent **| French**: Very Good
