

# Mariam Nader

**Address:** Nabatiyeh-Lebanon | **Phone:** 00961 76 196 536 | **Email:** [mariamnader034@gmail.com](mailto:mariamnader034@gmail.com) **Birthdate:** August 6, 2003

## Objective

Detail-oriented Computer Engineering graduate (GPA: 3.7/4.0) pursuing a Master's degree in Computer and Communication Engineering. Equipped with hands-on experience in mobile and web development through an internship at Cedars Software Solutions, as well as strong skills in software development, database design, embedded systems, and digital electronics. Developer of projects such as MedAlert, a Wedding Planner system using MySQL and Java GUI, and AI-powered automation workflows using n8n and RAG-based systems. Strong communicator with proven tutoring experience and solid analytical and problem-solving skills. Seeking to grow further in the AI and automation domain, contributing technical expertise in building intelligent, AI-driven systems.

## Education

### Lebanese International University (LIU)

- Master's Degree in Computer and Communication Engineering | 2025-Present
- Bachelor's Degree in Computer Engineering, **GPA: 3.7/4** | 2021-2025

### Projects:

- **Senior Project – MedAlert** Designed a smart system to monitor drug storage conditions and remind patients to take medication.
- **AI Smart Contract Security Reviewer (n8n, RAG)** - Built an automated auditing pipeline using GPT-4o and a Retrieval-Augmented Generation knowledge base (OpenAI embeddings + Supabase Vector Store) to detect vulnerabilities in smart contracts and trigger real-time Telegram alerts.
- **AI-Powered Facebook Ad Generator (n8n)** - Designed an automation that scrapes competitor Facebook ads via Apify and uses AI image generation to recreate their style and layout with the user's own product and branding.
- **Wedding Event Planner (Database Project)** - Created a wedding booking system using XAMPP and MySQL to manage clients and reservations.
- **Wedding Planner (Java GUI Application)** - Built a desktop application using Java GUI for event planning and service selection.
- **2-Bit ALU (Logic Lab)** - Designed a logic unit to perform decrement and shift operations using multiplexers.
- **Water Level Detector (Electronics Lab)** - Built a transistor-based circuit to detect and alert when water reaches a specific level.
- **ROBOMED (Tinkercad – Intro to Engineering)** - Simulated a system that controls medication storage and gives voice reminders using Tinkercad.
- **FM Demodulator (Analog Lab)** - Constructed a PLL-based circuit to demodulate FM signals and extract audio output.
- **Low Pass Filter (Electric Circuit Lab)** - Designed a circuit that filters out high-frequency signals while passing lower ones.

## Experience

### Intern – Mobile & Web Developer

| September 2025 – November 2025 |

#### Cedars Software Solutions (CSSLTD) | Nabatiyeh, Lebanon

- Worked with the Mobile Development Team using **Flutter** to build dynamic Attendance Management features
- Integrated backend APIs developed in **PHP** with a **MySQL** database as part of a full-stack architecture
- Contributed to the Web Development Team by developing website components using **HTML, CSS, and JavaScript**
- Worked with modern stack technologies including **Supabase, Vercel, and Next.js** in backend and deployment environments

### Private Tutor

| 2022 – Present |

#### Freelance

- Delivered private sessions for high school students in **Mathematics and Physics**, breaking down **complex theories** into understandable components
- Taught **university-level engineering** subjects such as electronics, programming, digital logic, and microcontroller systems
- Assisted students with understanding course material **and lab experiments** through problem-solving and simulations
- Created personalized lesson plans that align with student goals, enhancing engagement and academic performance

### Freelance Computer Engineering Projects

| 2024 – Present |

#### Remotely

- Assisted peers and junior students with **project development in Java, Arduino, and circuit design**
- Built small applications such as calculators, login systems, and database forms as practice or by request
- Designed and tested circuit simulations using **Tinkercad** and **Proteus** for academic assistance

## Trainings and Certificates

---

- Agent Zero Program – Amir Discovers AI Community |July – August 2026|  
Completed hands-on tasks and practical applications related to AI agent workflows.
- Cybersecurity Boot camp – CyberTalents (Cohort 9) |September – October 2024|  
Covered network threats, basic ethical hacking, and secure system design principles.
- Photography Course – Creative Academy (2023)  
Focused on camera handling, lighting, photo editing, and basic principles of visual storytelling.

## Personal Skills

---

- Strong Communication & Teaching Skills
- Creative Problem Solver
- Attention to Detail
- Adaptability in Technical Environments
- Time Management & Organization
- Team Collaboration & Leadership
- Analytical and Logical Thinking

## Technical Skills

---

- Microsoft Office (Word, Excel, PowerPoint)
- Programming Languages: Java, Python, C, C++, Assembly
- AI & Automation: Machine Learning, n8n (Workflow Automation), Retrieval-Augmented Generation (RAG), Supabase Vector Store, Apify, Claude Code
- Web & Database: HTML, CSS, JavaScript, MySQL, XAMPP, PHP, RESTful APIs, Responsive Web Design, Supabase, Next.js
- Mobile Development: Flutter, UI Components, API Integration
- Software Development: Java GUI, NetBeans, Visual Studio, Object-Oriented Programming, Git (Version Control), Postman (API Testing)
- Hardware & Electronics: Arduino, Tinkercad, Proteus, Multisim, Logic Design, FM Receivers, Low Pass Filters, FreeRTOS (Real-Time Operating Systems)
- Networking & Security: Packet Tracer, Network Fundamentals, Cybersecurity Basics
- Multimedia & Design: Photography, Logo Design, Canva, Adobe Photoshop (basic), Visual Content Creation
- Tools & Platforms: MATLAB, Octave, Eclipse, Git, Vercel, GitHub
- Operating Systems: Windows, Linux (basic)

## Languages

---

**Arabic:** Native | **English:** Fluent | **French:** Very Good
